## Language editor generation

1. Click on the /model/<name>Opt.ecore file, select new -> other -> EMF Generator Model. Click Next.

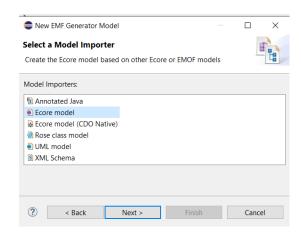

2. Fill the *File name* field as suggested. Click *Next* 

\_\_\_\_\_

3. Choose *Ecore model* and click *Next* 

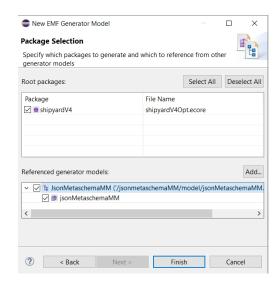

Ecore Import Specify one or more '.ecore' or '.emof' URIs and try to load them Browse File System... Browse Workspace... platform:/resource/shipyardV4/model/shipyardV4Opt.ecore Load Click Load and the Next Next > Finish ? < Back

New EMF Generator Model

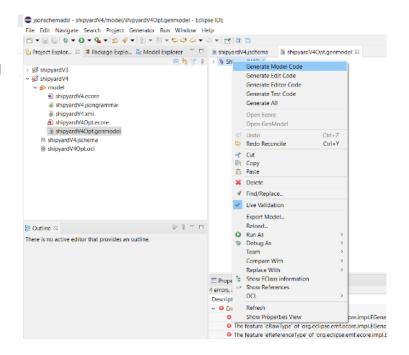

×

4.

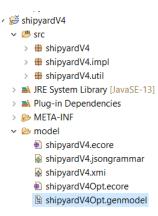

5. Select packages as in the figure below and click Finish

6. It will generate a file with extension .genmodel under the folder model . Open it. A tree will be displayed. Right click it and then select Generate Model Code

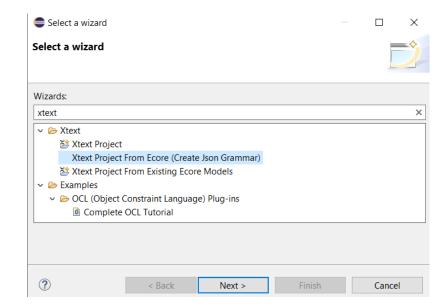

7. A new folder src with code will be generated.

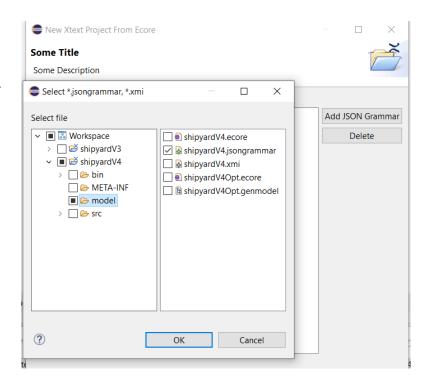

.....

8. Click on File -> New -> Other in the Eclipse top menu. Choose Xtext Project From Ecore (Create json Grammar).
Click Next.

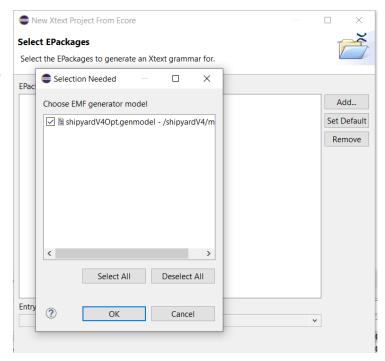

9. Click Add JSON Grammar, and select the file *.jsongrammar* under the folder model of your project. Click *OK* .

\_\_\_\_\_\_

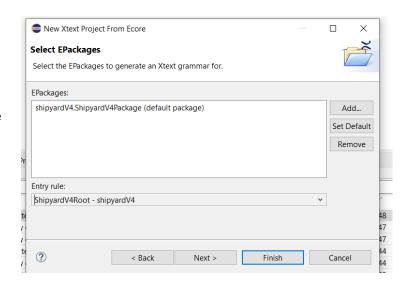

## 10. Click Add.

Select the file with extension .genmodel generated in the previous wizard. Click OK.

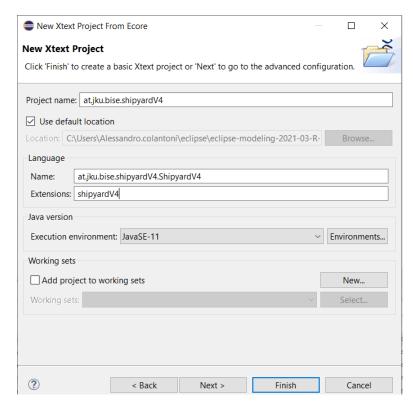

------

11. In the *Entry rule* select the root of your metamodel (It has the name of your project plus *Root* Suffix). Click *Next*. **DO NOT** click Finish.

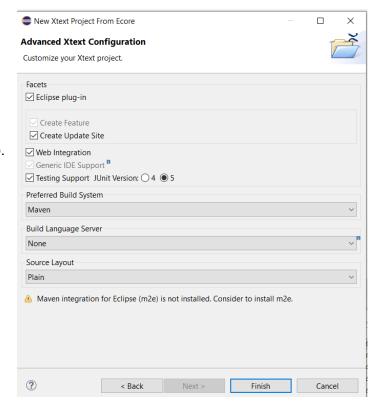

12. Choose the proper name for your Editor. Above all take care at the *Extensions* field: This will be the extensions of the files that the editor will recognize.. Make sure to use JAVA 11.0.10 or newer.. Click *Next*, **DO NOT** click *Finish*.

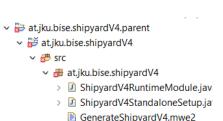

------

13. Fill the Fields as in the picture. But DO NOT check Web Integration: the picture is wrong. Click *Finish*. Wait until Eclipse has finished its job.

------

14. You will see a new project created. Open its folders as in the picture until you find a file with extension .xtext.

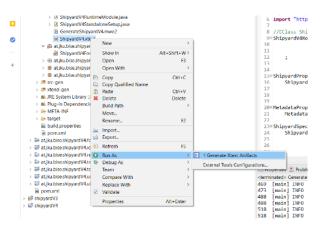

\_\_\_\_\_\_

15. Open the file. Probably you will see a warning like in the picture. Move your mouse over the warning and apply the suggestion. Save the file if required.

```
1 // automatically generated by Xtext JSON
2 grammar at.jku.bise.shipyardV4.ShipyardV4 with org.eclipse.xtext.common.Terminals
3
4 import "http://jku.bise.at/shipyardV4"
5 import "http://www.eclipse.org/emf/2002/Ecore" as ecore
6 import "http://at.jku.bise/jsonMetaschemaMM" as jsonMetaschemaMM
7
8 //EClass ShipyardV4Root
9 ShipyardV4Root returns ShipyardV4Root:
10 //EReference is not a keyword
11 shipyardV4Root=Shipyard
```

16. Right click the file with extension *xtext* and then click *Run As* and *1.* 

Generate Xext Artifacts.

```

## 20. Add the following code snippet:

```
public void register(EValidatorRegistrar registrar) {
    super.register(registrar);
    ShipyardV4Package ePackage = ShipyardV4Package.eINSTANCE;

URI basicOclURI = URI.createPlatformPluginURI("/shipyardV4/shipyardV4Opt.ocl", true);
    registrar.register(ePackage, new CompleteOCLEObjectValidator(ePackage, basicOclURI));
}
```

This code is for the case of a project named *shipyardV4*. Take care of the imports. The result of the whole class should be something like the picture below.

```

 E Outline ⊠
```

- 21. Execute un project clean build.
- 22. Regenerate the xtext artifacts
- 23. Open the Java Perspective.
- 24. In the eclipse top menu click *Run Configurations*, and create your *language editor launcher* like in the picture.

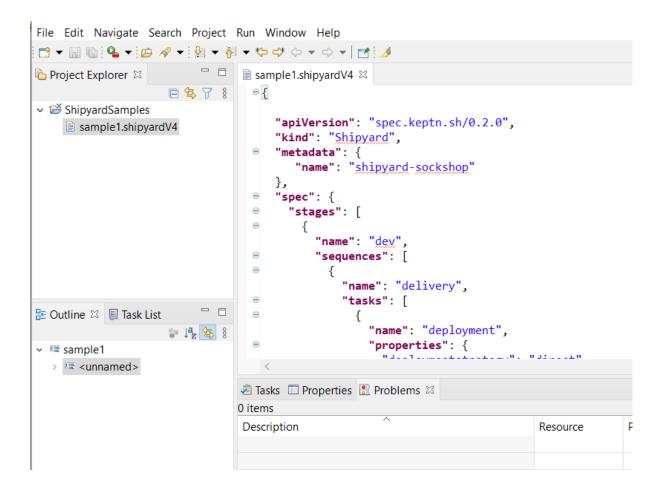

------

- 25. Run it. Wait that a new eclipse is launched
- 26. Create your simple plain project; create a file with the extension you chose in the language editor creation. You will be asked if you want to convert the project to an XText project. Answer YES. Open you file

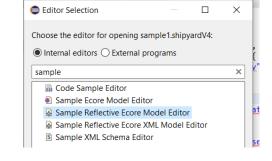

27. An example:

\_\_\_\_\_

28. Right click on the file with the extension that you have created (e.g., sample1.shipyardV4) and select *open with -> other*. Choose then the *Sample Reflective Ecore Model Editor* and click *OK*. Wait some second and you will see the tree editor for your file, that is a model.

Open the view properties, to see more details when you select an element of the tree.

Changes applied to the tree are reflected in the file json style and vice versa.
